one Introduction 1

Part One: Principles
two The concept and measurement of poverty 29
   David Gordon
three The international measurement of ‘absolute’ and
   ‘overall’ poverty: applying the 1995 Copenhagen
   definitions to Britain
   Peter Townsend, David Gordon and Christina Pantazis
four The necessities of life 89
   Christina Pantazis, David Gordon and Peter Townsend
five The concept and measurement of social exclusion 123
   Ruth Levitas

Part Two: Processes
six Does work pay? Employment, poverty and exclusion from social relations 163
   Nick Bailey
seven Debt and financial exclusion 191
   Stephen McKay and Sharon Collard
eight Social exclusion and local services 217
   Tania Fisher and Glen Bramley
nine Crime, ‘disorder’, insecurity and social exclusion 249
   Christina Pantazis
ten Mental health, poverty and social exclusion 285
   Sarah Payne

Part Three: People
eleven Children, poverty and social exclusion 315
   Eva Lloyd
twelve Youth, poverty and social exclusion 347
   Eldin Fahmy
Poverty and social exclusion in Britain

thirteen  Gender, poverty and social exclusion  375
Christina Pantazis and Elisabetta Ruspini

fourteen Lone mothers, poverty and social exclusion  405
Ruth Levitas, Emma Head and Naomi Finch

fifteen Pensioners, poverty and social exclusion  431
Demi Patsios

sixteen Conclusion  459

Index  471
# List of figures

1.1 Low income in Britain, 1961-2002 5  
2.1 Definition of poverty 40  
2.2 Dynamics of poverty 42  
2.3 Revised definition of poverty 43  
A2.1 Average income by deprivation score  (95% Confidence Intervals) 67  
A2.2 Standard of living score by income with population groups 68  
4.1 Perception of necessities: comparing men and women 99  
4.2 Perception of necessities: comparing younger and older respondents 101  
4.3 Perception of necessities: comparing minority ethnic respondents and non-minority ethnic respondents 102  
4.4 Perception of necessities: comparing respondents in social classes I/II and IV/V 104  
4.5 Perception of necessities: comparing the richest and poorest respondents 105  
4.6 Percentage of households considering items and activities as necessary, 1990-99 107  
4.7 Average number of non-necessities, by respondent’s deprivation score 115  
4.8 Average number of non-necessities, by respondent’s history of poverty 115  
5.1 Household income, by participation (smoothed results) 152  
5.2 Number of indicators of social exclusion and poverty reported by respondents, out of a possible eight 154  
6.1 Poverty rates, by individual employment status and gender 170  
6.2 Objective and subjective poverty, by employment status and gender 172  
6.3 Social relationships, by employment status and gender 177  
6.4 Social support, by employment status and gender 178  
6.5 Practical support, by employment status and gender 179  
6.6 Emotional support, by employment status and gender 179  
7.1 Percentage of respondents lacking a current account 199  
7.2 Extent of arrears and borrowing, by age group 204  
7.3 Links between income and debt, by age group 205  
8.1 Percentage of households using service, 1990 and 1999 219  
8.2 Percentage of households using service, 1999 220  
8.3 Percentage of respondents regarding selected local services as essential, 1990 and 1999 (ranked according to 1999 %) 224  
8.4 Percentage of respondents regarding selected local services as essential and desirable, 1999 (ranked) 225
8.5 Service constraint or inadequacies for top 14 public and private local services, 1999 (ranked by % constrained)

8.6 Usage rates for selected services, by urban/rural indicator, 1999

8.7 Usage rates for services targeted at children, the elderly and disabled, by urban/rural indicator, 1999

8.8 Usage rates for selected services, by North/South indicator, 1999

9.1 Percentage of respondents experiencing harmful events and conditions in the previous year, by poverty status (PSE measure)

9.2 Perception of a serious problem in the respondent’s local area, 1997-98

9.3 Percentage of respondents perceiving issue as common in their local area, by poverty status (PSE measure)

9.4 Percentage of respondents reporting disadvantages in their area, by poverty status (PSE measure)

9.5 Percentage of respondents worrying about being a victim of crime, by poverty status (PSE measure)

9.6 Percentage of the population worrying about different harmful events and conditions, by poverty status (PSE measure)

10.1 Self-reported poverty and mental health

10.2 Satisfaction with housing and mental health

10.3 Percentage of respondents with GHQ score of 4+, by employment status

10.4 Reasons for isolation from others and mental health

10.5 Mental health and factors restricting social relationships

10.6 Social activities and mental health: percentage unable to afford activity with GHQ score of 4+

11.1 Changing perceptions of necessities relating to children

11.2 Perception of necessities: comparing parents and non-parents

11.3 Comparison of parents and children going without

12.1 Respondents with household incomes below MIG threshold (%)

12.2 EU poverty rate in the UK and EU15 by age group, 1998-2000

12.3 PSE poverty, by age group and gender (%)

12.4 The low paid as a percentage of all employees, by age

12.5 Dissatisfaction with amenities and community services, by age group (%)

12.6 Civic engagement scale, by age group (%)

15.1 Gender differences in measurements of poverty within pensioner households (% below, BHC)
15.2 Average difference between actual net weekly household income and the MIG, by PSE measure 438
15.3 Percentage of poor and non-poor pensioners reporting restricted use of at least one ‘domestic’ utility 443
15.4 Percentage of poor and non-poor pensioners reporting lower levels of combined practical and emotional potential support 450
List of tables

2.1 Paupers’ incomes, 1688-1812 38
2.2 Population groups in the PSE Survey 43
2.3 Income poverty rates in the PSE Survey 46
2.4 Definitions of income (Canberra Group recommendations) 48
2.5 PSE equivalised income scale 51
2.6 Subjective poverty rates in the PSE Survey 52
A2.1 Validity and reliability summary table 65
A2.2 Brief summary of ANOVA and logistic regression models of optimum position for the poverty threshold 66
3.1 Income needed each week to keep a household of your type out of absolute, general and overall poverty 76
3.2 Income is either ‘a lot’ or ‘a little’ below level needed each week to keep the household out of absolute, overall and general poverty, by population category 77
3.3 Weekly household income said to be needed to escape different levels of poverty 77
3.4 Income needed each week to keep household out of absolute poverty, by mean number of unaffordable necessary items and by actual level of equivalised net weekly household income 78
3.5 Income needed each week to keep household out of general poverty, by mean number of unaffordable necessary items and by actual level of equivalised net weekly household income 78
3.6 Income needed each week to keep household out of overall poverty, by mean number of unaffordable necessary items and by actual level of equivalised net weekly household income 79
3.7 Income is either ‘a lot’ or ‘a little’ below the level each week to keep the household out of absolute, overall and general poverty, according to objective and subjective poverty variables 79
3.8 Income is either ‘a lot’ or ‘a little’ below the level each week to keep the household out of absolute, overall and general poverty, according to health and economic status 80
A3.1 Potential absolute poverty indicators in the PSE Survey 87
A3.2 Final absolute deprivation index (21 variables) 88
4.1 Percentage of respondents perceiving adult item/activity as necessary 95
4.2 Perception of adult necessities in England, Scotland and Wales (%) 97
4.3 Percentage of households perceiving items and activities as necessary, 1999, 1990 and 1983 108
4.4 Thatcher’s children? 111
5.1 Harmonised indicators of social exclusion adopted by the European Union in 2001 131
5.2 Proposed European indicators of social exclusion 132
5.3 Percentage of respondents not participating in common social activities, by key social and economic variables 140
5.4 Lack of participation in common social activities, by different measures of poverty 141
5.5 Mean number of common social activities not participated in, by different measures of poverty 141
5.6 Levels of practical and emotional support, by key social and economic variables 144
5.7 Levels of practical and emotional support among working and poor households (%) 148
5.8 Percentage of respondents not participating in common social activities because unable to afford them, by key social and economic variables 151
5.9 Percentage of poor people experiencing social exclusion 153
6.1 Employment rates, by gender and individual characteristics (%) 167
6.2 Support questions in the PSE Survey 175
A6.2.1 Logistic regression models – employment rates 186
A6.2.2 Logistic regression models – objective and subjective poverty 187
A6.2.3 Logistic regression models – social relationships 188
A6.2.4 Logistic regression models – social support 189
7.1 Typologies of debt and financial exclusion 192
7.2 Dimensions of financial exclusion 195
7.3 Poverty, financial exclusion and debt (%) 196
7.4 Poverty over time, financial exclusion and debt (%) 196
7.5 Extent of debt, by bank account ownership 197
7.6 Access to current accounts, by age group 199
7.7 Importance of access to banks, among those with and without accounts (%) 200
7.8 Income groups unable to afford to save regularly, by income (PSE-equivalised) (%) 202
7.9 Arrears in the past year 203
7.10 Types of borrowing 204
7.11 Extent of debt among respondents aged under 60, by residence (%) 206
7.12 Extent of debt among respondents aged under 60, by psychiatric health 207
8.1 Standardised usage ratios, by class, equivalent income and poverty, for public local services, 1990 and 1999 221
8.2 Standardised usage ratios, by class, equivalent income and poverty, for selected public and private local services, 1999 (ranked by usage rate)

8.3 Supply, quality or cost: constraints on usage, by equivalent income and poverty, for local services, 1990 and 1999

8.4 Supply, quality or cost: constraints on usage, by equivalent income and poverty, for public and private local services, 1999

8.5 Supply, quality or cost: constraints on selected additional services, by equivalent income and poverty, for local services, 1990 and 1999 (% of all households reporting problems)

8.6 Influence of class, equivalent income and poverty on usage of local services in multivariate models, 1990 and 1999

8.7 Influence of class, car ownership, equivalent income and poverty on usage of local services in multivariate models, 1999

8.8 Influence of area characteristics on usage, 1999

8.9 Influence of local authority expenditure on usage, 1999

8.10 Association between service exclusion and other dimensions of exclusion

9.1 Percentage of respondents experiencing criminal harm in the previous year, by a selection of poverty and social exclusion variables

9.2 Percentage of men and women and younger and older respondents experiencing criminal harm in the previous year, by poverty status

9.3 Percentage of respondents experiencing non-criminal harm in the previous year, by a selection of poverty and social exclusion variables

9.4 Percentage of respondents reporting issue as common in their area and other area disadvantage, by a selection of poverty and social exclusion variables

9.5 Percentage of respondents feeling unsafe alone on the streets after dark or at home at night, by a selection of poverty and social exclusion variables

9.6 Percentage of men and women and younger and older respondents feeling unsafe on the streets or at home, by poverty status (PSE measure)

9.7 Percentage of respondents concerned about crime, by a selection of poverty and social exclusion variables

9.8 Percentage of respondents concerned about experiencing non-criminal harmful events and conditions, by a selection of poverty and social exclusion variables

9.9 Percentage of respondents concerned about non-criminal harmful events and conditions, by a selection of poverty and social exclusion variables

10.1 The distribution of poverty and poor mental health

Acknowledgements

The Poverty and Social Exclusion Survey of Britain (PSE) questionnaire contains both modified and new questions as well as questions which have been asked in the best social surveys from around the world. It builds on over one hundred years of experience in the social sciences in Britain in the scientific study of poverty. The authors acknowledge the contribution made to this research from the following sources and surveys: Breadline Britain in the 1990s, British Crime Survey, British Household Panel Survey, British Social Attitudes, Canadian General Social Survey, Disability Discrimination Act Baseline Survey, Eurobarometer, European Community Household Panel Survey, EuroQol 5D, General Household Survey, GHQ12, Harmonised Question Set, Health Survey of England, Living in Ireland Survey, Living in Britain Survey, Lorraine Panel Survey, MORI Omnibus, Poor Wales, Poverty in the United Kingdom, Small Fortunes: National Survey of the Lifestyles and Living Standards of Children, Survey of English Housing and the Swedish Living Conditions Survey.

The Breadline Britain in the 1990s survey was funded by London Weekend Television (LWT) with additional funding from the Joseph Rowntree Foundation and was carried out by Marketing and Opinion Research International (MORI). It was conceived and designed by Joanna Mack and Stewart Lansley for Domino Films, with the help of Brian Gosschalk of MORI. We would also like to thank Brian Gosschalk, Mark Speed and Sarah Birtles from MORI for their helpful comments and advice on the preparatory stages of this research.

The PSE Survey was carried out by the Office for National Statistics, Omnibus and General Household Survey (GHS) teams. We would particularly like to thank Ann Bridgewood, Jo Maher and Olwen Rowlands for all their sound professional advice and help. We would also like to thank Björn Halleröd of the University of Umeå, Tony Manners, Dave Elliot, Linda Murgatroyd and June Bowman at the Office for National Statistics, Richard Berthoud and Jonathan Gershuny at the University of Essex, Rick Davies of Swansea University, John Veit-Wilson, University of Newcastle upon Tyne and Michael Bitman at the University of New South Wales for their helpful advice.

We would like to thank Barbara Ballard, David Darton, David Utting, Lynne Spence, Alison Elks, Dominic Hurley, Mark Hinman and Peter Barclay from the Joseph Rowntree Foundation for their advice, encouragement and support throughout this project and Donald Hirsch
for his editing work on the JRF report. We would like to thank all the members of the JRF advisory committee for their helpful support, including Martin Barnes, Fran Bennett, Ann Bowtell, Ann Bridgwood, Gillian Dollamore, Rebecca Endean, Phillip Edwards, John Hills, Will Hutton, Joanna Mack, Tim Marsh, Jane Millar, Linda Nicolson, John Pullinger and Tom Taylor. The Joseph Rowntree Foundation funded the PSE Survey.

Thanks are due to Helen and May Gordon, Tom Hore, Jean Corston and Robert Hunter for their unfailing support during this research.

Dawn Rushen, Alison Shaw, Laura Greaves and Julia Mortimer deserve our thanks for their patience, professionalism and support in editing, producing and marketing this book.

Finally we would like to thank all our colleagues at the Universities of York and Loughborough who worked on the PSE Survey, particularly, Jonathan Bradshaw, Julie Williams, Naomi Finch, Sue Middleton, Laura Adelman and Karl Ashworth. Without their generous help and expertise this research would not have been possible.

Notes on contributors

Nick Bailey is a senior lecturer in the Department of Urban Studies, University of Glasgow and Acting Director of the Scottish Centre for Research on Social Justice. His interests include: labour markets, economic restructuring and welfare reform; area deprivation and neighbourhood policy; and housing policy.

Glen Bramley is Professor of Urban Studies and Director of the Centre for Research into Socially Inclusive Services (CRSIS) at Heriot-Watt University in Edinburgh, where he leads a substantial research programme in housing and urban studies. Recent research is focused particularly on poverty, deprivation and local services (including education), flows of funds to local areas, housing need and affordability, low cost home ownership, planning for new housing and the impact of planning and infrastructure on city competitiveness. His publications include Key issues in housing; Planning, the market and private housebuilding; Equalization grants and local expenditure needs; and Analysing social policy.

Sharon Collard is a research fellow at the Personal Finance Research Centre, based at the University of Bristol. Since joining the Centre in 1998, she has worked on a wide range of research projects, exploring topics such as the use of credit and other financial services by low-income consumers, the provision of money advice and debt counselling services, and financial capability. In a personal capacity, Sharon is on the management committee of Bristol Debt Advice Centre.

Eldin Fahmy is a research fellow in the Centre for the Study of Poverty and Social Justice at the School for Policy Studies, University of Bristol. His research interests include: youth, poverty and social exclusion; poverty, area-based initiatives and anti-poverty strategy; rural poverty; and inequality and social and civic participation.

Naomi Finch is a research fellow at the Social Policy Research Unit at the University of York. She has undertaken research, including comparative research, focusing on issues of poverty, living standards, and family policy. Her current research interests focus on pensioner poverty.
Tania Fisher is a research fellow in the Health Policy and Economic Research Unit at the British Medical Association. Her current research focuses on health policy. Other research interests include urban change and development, population change and social inclusion.

David Gordon is Professor of Social Justice and Director of the university-wide Townsend Centre for International Poverty Research at the University of Bristol. His main research and publications are in the fields of the scientific measurement of poverty, social justice and social harm, area-based anti-poverty measures, childhood disability, the causal effects of poverty on ill health, housing policy and rural poverty.

Emma Head is a research fellow in the School of Sociology and Social Policy, University of Leeds, UK. Her research interests are broadly in the areas of family policy and family sociology; and she has particular interest in issues of lone parenthood, care and poverty.

Ruth Levitas is Professor of Sociology and Head of Department elect at the University of Bristol. She writes on contemporary politics and policy, inequality, and social indicators, as well as on social theory and utopianism. Her books include The ideology of the New Right (1986), The concept of utopia (1990), Interpreting official statistics (ed with Will Guy, 1996) and The inclusive society? Social exclusion and New Labour (1998, second edition 2005).

Eva Lloyd is Senior Lecturer in Early Childhood Studies in the Centre for the Study of Poverty and Social Justice at the School for Policy Studies, at the University of Bristol. Prior to joining Bristol University, she spent 15 years with children’s NGOs. She is also an associate of the Centre for Family Research at the University of Cambridge and an honorary research fellow at the Centre for Childcare Research at the Queen’s University Belfast, UK. Her research interests include early childhood policies and programmes, anti-poverty strategies and evidence-based policy and practice in the social sciences.

Steve McKay is Deputy Director of the Personal Finance Research Centre, based at the University of Bristol. His research interests include low-income families, the effects of benefits and tax credits on incentives and behaviour, pensions and retirement, and measuring poverty. He recently completed work on a new survey of attitudes to inheritance.
Christina Pantazis is Head of the Centre for the Study of Poverty and Social Justice at the University of Bristol. Her main research interests are in poverty, social exclusion and inequality, and crime, criminalisation and social harm. Previous publications include: Breadline Britain in the 1990s (with David Gordon), Tackling inequalities: Where are we now and what can be done? (with David Gordon) and Beyond criminology: Taking harm seriously (with Paddy Hillyard, Steve Tombs, and David Gordon).

Demi Patsios is a research fellow in the Centre for Health and Social Care, within the University of Bristol’s School for Policy Studies. He was previously a research fellow for three years within the University’s International Institute on Health and Aging. His main areas of research include the health and social care of older people, long-term and community care, cross-national comparisons of ageing policy and poverty and social exclusion of older populations in the UK.

Sarah Payne is a senior lecturer and the Head of the Centre for Health and Social Care Research at the School for Policy Studies at the University of Bristol. Her main research in recent years has focused on poverty and social exclusion, sex and gender influences on health, and policy issues including the care of women in secure psychiatric hospitals, preventing suicide, and gender equity in mental health services.

Elisabetta Ruspini is Associate Professor in Sociology, Faculty of Sociology, University of Milano-Bicocca, Milan, Italy. Her research interests include: the gender dimension of poverty and social exclusion; single motherhood and fatherhood; the social construction of gender identities; changing femininities, masculinities and sexual minorities; and within the methodological field: gender issues in social research; the analysis of social change; longitudinal research and analysis. Her recent publications include: Introduction to longitudinal research; The gender dimension of social change: The contribution of dynamic research to the study of women’s life courses (with Angela Dale); and Le identità di genere (Gender identities).
