List of figures, tables and boxes

Figures
3.1  Proportion of respondents with standardised and complex articulations of ethnicity, by ethnic group  35
3.2  Ethnic group identification, by country of birth  39
3.3  Probability of expressing importance of ethnic identity, by ethnic group  41
3.4  Religious affiliation, by ethnic group  43
3.5  Probability of expressing importance of religion, by religious affiliation  44
3.6  Probability of expressing importance of religion, by ethnic group  45
3.7  Probability of regular engagement in practices associated with one's ethnic background, by ethnic group  47
3.8  Probability of feeling part of British and English society, by ethnic group  49
4.1  Experience of any racial assault (insult, property damage, physical assault) by gender  63
4.2  Number of types of different settings in which racial discrimination is experienced  65
4.3  Worries about experiencing racial assault or discrimination  71
4.4  Changes in police activity and being stopped by the police during the COVID-19 pandemic  72
5.1  Likelihood of having had a positive test for COVID-19 compared with the White British group  82
5.2  Experience of COVID-19-related bereavement and bereavement of any kind compared with the White British group  84
5.3  Experience of physical multimorbidity for women and men compared with White British counterparts  85
5.4  Risk of depression and anxiety compared with the White British group  87
5.5  Likelihood of reporting loneliness and reporting an increase in feelings of loneliness during the COVID-19 pandemic compared with the White British group  89
5.6  Risk of not being able to access health and social care services compared with the White British group  90
6.1  Accommodation type, by ethnic group  100
6.2  Accommodation type, by selected ethnic group, for London and outside London  101
6.3  Overcrowded households during the COVID-19 pandemic, by ethnic group  103
List of figures, tables and boxes

6.4 Overcrowded households, based on the number of generations present in the household 104
6.5 Percentage of respondents with local access to public outdoor space, by ethnic group 106
6.6 Percentage of respondents with private outdoor space, by ethnic group 107
6.7 Likelihood of experiencing a residential move since February 2020 compared with the White British group 109
6.8 Feelings of belonging to local area, by ethnic group 110
6.9 Likelihood of reporting strong or fair local belonging compared with the White British group 112
6.10 Change in local belonging during the COVID-19 pandemic, by ethnic group 113
7.1 Selected economic activities for women and men, by ethnic group 122
7.2 Labour force participation, employment and unemployment rates compared with the White British group 126
7.3 Standard and precarious employment during the COVID-19 pandemic, by ethnic group 128
7.4 Rate of precarious employment compared with the White British group 131
7.5 Rate of being placed on furlough compared with the White British group 133
7.6 Rate of experiencing increased working hours compared with the White British group 134
7.7 Risk of experiencing a reduction in pay compared with the White British group 136
7.8 Proportion worrying about job security compared with the White British group 137
8.1 Rate of being degree-educated compared with the White British group 146
8.2 Rate of being in a higher managerial, administrative or professional occupation compared with the White British group 150
8.3 Rate of homeownership compared with the White British group 152
8.4 Rate of experiencing financial difficulties prior to the COVID-19 pandemic compared with the White British group 155
8.5 Rate of experiencing financial difficulties during the COVID-19 pandemic compared with the White British group 156
8.6 Rate of experiencing an income decrease during the COVID-19 pandemic compared with the White British group 159
8.7 Rate of experiencing no change in income compared with the White British group 160
8.8 Benefit receipt rate compared with the White British group 163
8.9 Rate of having worried about finances compared with the White British group 165
9.1 Trust in the UK Parliament in relation to its management of the COVID-19 pandemic, by ethnic group 174
9.2 Regional differences in the level of trust in the UK Parliament in relation to its management of the COVID-19 pandemic, ethnic minority respondents compared to White British respondents 176
9.3 Trust in the Scottish Parliament in relation to its management of the COVID-19 pandemic, by ethnic group 177
9.4 Trust in the Welsh Assembly in relation to its management of the COVID-19 pandemic, by ethnic group 178
9.5 Trust in the local elected mayor in relation to their management of the COVID-19 pandemic, by ethnic group 179
9.6 Political interest, by ethnic group 181
9.7 Political party affiliation (any), by ethnic group 182
9.8 Political party preferences, by ethnic group 184
9.9 Differences in political party preferences between ethnic minority and White British respondents in England, Scotland and Wales 185
9.10 Support and opposition for Black Lives Matter, by ethnic group 187

Tables
1.1 Ethnic groups in the EVENS survey 4
2.1 Allocation of the proportional sample, the desired sample size after oversampling of ethnic minority groups and achieved sample size of the EVENS survey 17
2.2 Final sample size of the EVENS survey, by sample components 18
2.3 The EVENS sample: a) Ethnic groups by age and sex and b) ethnic groups by region of Britain 20
2.4 Matching variables common to the Annual Population Survey (APS) and the European Social Survey (ESS) 25
2.5 European Social Survey (ESS) participation variables 26
2.6 Summary statistics of Gower's Distances in the matching of the Annual Population Survey (APS) and the European Social Survey (ESS) 27
2.7 Distributions of alternative weighting schemes of EVENS 28
3.1 Examples of complex articulations of ethnicity, by ethnic group 36
4.1 Experience of racial assault prior to the COVID-19 pandemic, by ethnic group 59

Notes on contributors

**Andrea Aparicio-Castro** is a PhD candidate in Social Statistics at the University of Manchester (UoM) and a Fellow of the Higher Education Academy. She is also a scholar of the ESRC North West Social Science Doctoral Training Partnership and a Cathie Marsh Institute research member. She graduated as an MSc in Social Research Methods and Statistics from the UoM, and as a Specialist in Statistics and Sociologist from the National University of Colombia. Her career has focused on applying quantitative methodologies in social sciences, specialising in data integration, imputation of data, multilevel and hierarchical modelling, and forecast from a Bayesian perspective.

**Laia Bécares** is Professor of Social Science and Health in the Department of Global Health and Social Medicine, King’s College London. Her research interests are in studying the pathways by which the discrimination and marginalisation of people and places lead to social and health inequalities across the life course, with a specific focus on racism and heteronormativity as systems of oppression. She is a member of the ESRC Centre on the Dynamics of Ethnicity (CoDE).

**Neema Begum** is Assistant Professor in British Politics at the University of Nottingham. Her research uses mixed-methods approaches to analysing British ethnic minority political attitudes, voting behaviour and political representation. She was formerly a research associate at CoDE, where she analysed ethnic minority representation in UK local government. She has also conducted research on ethnic minority voting behaviour and immigration attitudes in the 2016 EU referendum, decolonising the university curriculum and ethnic minority women’s political activism.

**Magda Borkowska** is Senior Research Officer at the Institute for Social and Economic Research, University of Essex. She has conducted research on inequalities experienced by ethnic and immigrant minorities, social cohesion, civil society, neighbourhood effects and political attitudes. In her research she primarily uses quantitative, longitudinal approaches to study life course outcomes. She previously worked in the Policy Unit of Understanding Society (UK Household Longitudinal Study), where she frequently collaborated with government departments researching gender inequalities in labour market outcomes, immigrant integration and residential segregation.
Ken Clark is Senior Honorary Research Fellow at the Department of Economics and a member of the Centre on the Dynamics of Ethnicity at the University of Manchester. He is also an IZA Research Fellow. His published work is broadly in the area of labour economics, where he specialises in the analysis of employment and wage differentials between different ethnic and immigrant groups. As well as being published in academic journals, his work has contributed to considerations of the best policies to improve labour market equality for government and other policy makers.

Daniel Ellingworth is Researcher at CoDE at the University of Manchester, working on the design and analysis of EVENS. His previous work has focused on crime and criminal justice, addressing patterns of repeat victimisation and area crime rates, and the evaluation of a range of offender interventions.

Nissa Finney is Professor of Human Geography at the University of St Andrews. She has published and taught widely on ethnic inequalities, residential mobility and housing, neighbourhood change and segregation. She is a Fellow of the Royal Geographical Society, former Chair of the Royal Geographical Society (with the Institute of British Geographers) Population Geography Research Group, member of the ESRC Centre for Population Change (CPC) and a founding member of CoDE. On ethnic inequalities, her work has brought new understandings in population scholarship, evidencing differential opportunities and experiences of ethnic groups in residential choices, underlying processes of racism and discrimination, and policy narratives that marginalise groups and places.

Joseph Harrison is Research Associate at CoDE. Alongside this, he is studying for a PhD at the University of St Andrews. His research uses quantitative methods and longitudinal data to focus on Pakistani immigrants and their descendants in the UK and Norway, particularly relating to their family dynamics and health. Previously he has worked as a research assistant at Stockholm University Demography Unit (SUDA) from where he also graduated with an MSc in Demography. Before that, he studied Economics and International Development at the University of Birmingham.

Hannah Haycox is ESRC Postdoctoral Fellow at The University of Manchester where she is researching racial inequalities, refugee resettlement and multi-scalar policy governance. Her previous work as Research Assistant with CoDE at The University of St Andrews provided an intersectional approach to lived experiences of housing policy and practice, including its racialised, classed and gendered impacts. She has been the recipient of several prestigious prizes, including the Presidential Doctoral Scholar Award for future global leaders of research. She has disseminated policy
recommendations to high-quality academic journals, UNHCR, media outlets, cross-parliamentary groups and non-governmental organisations.

Emma Hill is Research Fellow in Geography and Sustainable Development at the University of St Andrews, where she is working on an ESRC-funded project on the racialised dynamics of post-pandemic housing practices in the UK. She was previously a Research Fellow on the JPI ERA Net/ Horizon 2020 Governance and Local Integration of Migrants and Europe’s Refugees (GLIMER) Project in Sociology at the University of Edinburgh, and completed her PhD in Cultural Research at Heriot-Watt University, for which her doctoral thesis was awarded the 2017 MacFarlane Prize. She is an associate editor for the *Identities: Global Studies in Culture and Power* journal, a steering committee member for the Glasgow Refugee, Asylum and Migration Network (GRAMNet) and a Trustee for the Maryhill Integration Network (Glasgow). Her research interests include the postcolonial dynamics of South–North migration in former colonial centres.

Dharmi Kapadia is Senior Lecturer in Sociology at the University of Manchester and a member of CoDE. She is a mixed-methods researcher with interests in racism, mental health and illness, stigma and older people. She has also conducted research in ethnic inequalities in women’s use of mental health services and socioeconomic inequalities in suicide, and has also undertaken work looking at ethnic inequalities in the labour market and the role of social networks in poverty for different ethnic groups.

Angelo Moretti is Assistant Professor in Statistics at the Department of Methodology and Statistics, Utrecht University. He is a survey statistician and an elected member of the International Statistical Institute (ISI). He has conducted research in small area estimation under multivariate generalised mixed models, survey calibration, mean squared error estimation based on bootstrap approaches, and data integration methods (statistical matching and probabilistic record linkage). He is also interested in applications related to understanding geographical differences in social exclusion, crime and public attitude indicators.

James Nazroo is Professor of Sociology at the University of Manchester. His work on ethnic inequalities in health has led the field in demonstrating the importance of both socioeconomic inequalities and experiences of racism and racial discrimination. It has also provided novel findings on early life effects, generational differences, ecological effects and the positive effects of ethnic density. His publications in relation to ageing have advanced our understanding of the patterns and determinants of social and health inequalities, as well as the health and wellbeing outcomes of retirement
and later life employment, and he has also developed and tested theoretical models of class that more accurately capture socioeconomic position in later life. He is a Fellow of the British Academy, a Fellow of the Academy of Social Sciences and the founding Director of the ESRC Centre on the Dynamics of Ethnicity.

**Nico Ochmann** received his PhD in Economics from the University of Manchester in February 2021 with the dissertation title ‘Essays in immigration economics’. His areas of interest are immigration, ethnicity, labour, micro-econometrics and causal inference. He has been with CoDE since September 2020. He holds an MSc in Applied Economics from Montana State University, Bozeman, and a BSc in Economics from the University of Washington, Seattle. He has worked as an economist in the US, Canada, Germany and the UK.

**Natalie Shlomo** is Professor of Social Statistics at the University of Manchester. She is a survey statistician with interests in adaptive survey designs, data linkage and integration, non-probability sampling designs, statistical disclosure control and small area estimation. She has written a diverse range of publications in both survey statistics and the social sciences. She is a Fellow of the Academy of Social Sciences in the UK, an elected member of the ISI and a Fellow of the Royal Statistical Society.

**Michaela Šťastná** is Research Associate at CoDE. She is a PhD student at the University of St Andrews, researching family complexity and children’s outcomes in relation to family resources. Her research focuses on in-depth life-course measures of family complexity using advanced quantitative methods, and on early childhood outcomes, especially mental health. She holds an MSc in Attachment Studies from the University of Roehampton and a BSc Psychology from Birkbeck, University of London.

**Harry Taylor** is Research Associate in the Department of Global Health and Social Medicine, King’s College London, and formerly of CoDE. He received his PhD in Social Statistics from the University of Manchester in 2022. His primary research uses quantitative methods to explore ethnic inequalities in health. He has also conducted research into misinformation and vaccine hesitancy for the Alan Turing Institute. Prior to his doctoral study, he worked in spend analysis and logistics consultancy, investigating applications of AI techniques to business problems, among other projects.
Acknowledgements

We extend sincere thanks to all those who took part in the EVENS Survey. We hope that you see some of your stories in the pages of this book and that the evidence here and in the EVENS dataset will be part of the movement to effect change.

The EVENS researcher team at CoDE were unfailing in their dedication to this project. They worked with exceptional skill, imagination, tenacity and collegiality. Sincere thanks to Andrea Apricio-Castro, Neema Begum, Magda Borkowska, Daniel Ellingworth, Joseph Harrison, Angelo Moretti, Nico Ochmann, Michaela Šťastná and Harry Taylor. You are fine researchers indeed.

We are grateful to our CoDE colleagues for encouragement and for providing such a rich environment for scholarship. Thankyou to Emma Tsoneva and Hazel Burke for keeping the project mechanics running smoothly. Thankyou to CoDE Director Bridget Byrne and Co-Director Claire Alexander for your ongoing support for EVENS.

The EVENS Voluntary and Community Sector partners brought such energy and enthusiasm for this project and reminded us throughout of the fundamental motivation for producing evidence for equality. Thankyou to Black and Ethnic Minority Infrastructure in Scotland (BEMIS), Business in the Community, Ethnic Minorities and Youth Support Team Wales, Friends, Families and Travellers, the Institute for Jewish Policy Research, the Migrants Rights Network, the Muslim Council of Britain, NHS Race and Health Observatory, Operation Black Vote, the Race Equality Foundation, The Runnymede Trust, The Stuart Hall Foundation and The Ubele Initiative.

Words of Colour, led deftly by Joy Francis, produced the superb EVENS design and branding and led the strategic communications through survey recruitment with drive and dexterity. Thankyou.

The Ipsos team who managed the survey implementation were wholly committed to producing high quality data, and with eagerness to develop the innovative aspects of EVENS. It was a pleasure working with you.

Thanks go to the University of Manchester Ethics Committee for their careful consideration of the EVENS project and for their responsiveness to the many amendments to the ethics application.

We thank those who gave comments on drafts of this book particularly Bridget Byrne, Stephen Jivraj and Georgia Haire.

Thank you to Andrea Pazos for the cover design and production of tables and figures and for never hesitating in responding to the many and varied comments from the EVENS team.
We are obliged to Shannon Kneis, Anna Richardson, Annie Rose and colleagues at Policy Press/Bristol University Press and Newgen Publishing for careful work to bring this book to fruition.

We acknowledge the UK Data Service for providing the platform for EVENS data access and for user support.

The EVENS project would not have been possible without funding from the UKRI Economic and Social Research Council (ESRC). EVENS was funded via the CoDE grants ‘Exploring racial and ethnic inequality in a time of crisis’ (ES/V013475/1) and ‘The social, cultural and economic impacts of the pandemic on ethnic and racialised groups in the UK’ (ES/W000849/1).

Heartfelt thanks go to all those who promoted the EVENS Survey and have supported the broader project. NRF is grateful for the Riverside hideaway which provided a haven for overseeing the project (as well as a break from home schooling during lockdowns); and to Alan, Freya, Laurie and Xander for always findings ways and enthusiasm for what needed to be done. LBS is thankful for the support and love from Teo, Nuria, Tati, and abuela.

Nissa Finney, James Nazroo, Natalie Shlomo, Dharmi Kapadia, Laia Bécares
St Andrews, Manchester, London
November 2022

Note on the figures

Table 2.3 and Figures 4.1, 4.3, 6.1 and 7.2 have been published in a font size smaller than our house style. To see full-sized versions of these figures, please visit https://policy.bristoluniversitypress.co.uk/ethnic-inequalities-in-a-time-of-crisis.

To find out more about CoDE, EVENS and how to access the EVENS data see www.ethnicity.ac.uk
