First, I’d like to thank the inflammatory bowel disease team based at York Teaching Hospital. I owe them a huge debt of gratitude for their care and expertise. While I was working on this book my wonderful colleague and friend Andrew Webster sadly died. I’d like to remember him and his support here. In addition, I’d like to thank anyone who has talked to me about the ideas I’ve been working on over the last three years. Thanks go to Paul Stevens at Bristol University Press for supporting the project and for helping me to realize it, especially when I wasn’t quite sure of its exact direction in the early stages. And thanks to the anonymous reviewers of the proposal and manuscript; a number of their suggestions were very useful in shaping the content and direction of the book. Thanks go to Cupcake, Orion and Dexter for the companionship. As ever, extra special thanks go to Erik and Martha.
